Frank Reisner, a Hungarian-born American, turned a youthful passion for cars into one of the world's most famous small sports car building companies. From modest beginnings in Turin, Intermeccanica designed and produced a dozen different but exciting models that shook the motoring world in the 60s & 70s.

This book reveals the full history of the first generation Mercedes-Benz SLK, covering in detail the German, US, UK, Australian and Japanese markets. The perfect book to grace a Mercedes-Benz enthusiasts' library shelf, it's the definitive record of the model illustrated with stunning photographs.

"From the editors of Old cars weekly"--Cover.

The automobile seems to be as popular now as it ever was. Posters of cars still adorn many a child's bedroom wall, and school exercise books are full of doodles of cars. This book takes those notebook sketches and teaches you how to develop them into the car designs you see in magazines. Using simple to follow step-by-step drawings it guides you from pencil sketch to marker rendering, from doodle to highly visual computer generated artwork. Adrian Dewey has worked on designs as diverse as small sports cars to double decker buses, modified motors to concept Formula 1 cars, using various techniques and styles. In this book, he uses his knowledge of the different styles to guide the reader in creating great artwork and designs of their own. The book shows in detail how to use different materials and how to get the most out of each one, whether it be a great pencil sketch or a photo realistic vector illustration. The book also features an easy to follow index for quick reference on different types of drawing.

I made the Transport & Logistic Glossary aprox. 33.000 terms, as author with this fund, contributions and sponsorship I intend to build a libraries for transporters and students. Transport & Logistic Glossary creates highly targeted content geared to globally fleet owners and transport owner operator associations which have a different products, career opportunities and marketing strategies in the same industries as is all type of transportation. and managing activities that provide goods or services. The Transport & Logistic Glossary contain, classify and compare 33.000 acronyms and terms with alternative is an invaluable tool to make better trade strategy decisions, faster, allow logistics providers to manage the spiraling costs associated with shipping by sea and airfreight.

Fire can be a destructive, deadly element of nature, capable of obliterating forests, destroying homes, and taking lives. Den Latham's *Painting the Landscape with Fire* describes this phenomenon but also tells a different story, one that reveals the role of fire ecology in healthy, dynamic forests. Fire is a beneficial element which allows the longleaf forests of America's Southeast to survive. In recent decades, foresters and landowners have become intensely aware of the need to "put enough fire on the ground" to preserve longleaf habitat for red-cockaded woodpeckers, quail, wild turkeys, and a host of other plants and animals. *Painting the Landscape with Fire* is a hands-on-primer for those who want to understand the role of fire in longleaf forests. Latham joins wildlife biologists, foresters, wildfire fighters, and others as they band and translocate endangered birds, survey snake populations, improve wildlife habitat, and conduct prescribed burns on public and private lands. *Painting the Landscape with Fire* explores the unique southern biosphere of longleaf forests. Throughout, Latham beautifully tells the story of the resilience of these woodlands and of the resourcefulness of those who work to see them thrive. Fire is destructive in the case of accidents, arson, or poor policy, but with the right precautions and safety measures, it is the glowing life force that these forests need.
