~~Pinel encourages interactive learning and creative thinking. His clear and engaging presentation makes the material personally and socially relevant to the reader. For undergraduate junior/senior level courses in Behavioral Neuroscience, Physiology of Behavior, Biopsychology, Human Neuropsychology, or Physiological Psychology. Biopsychology is an introduction to the study of the biology of behavior; it focuses on the neural mechanisms of psychological processes. The defining feature of Biopsychology is its unique combination of cutting-edge biopsychological science and student-oriented discourse. Rather than covering topics in the usual textbook fashion, it interweaves the fundamentals of the field with clinical case studies, personal implications, social issues, helpful metaphors, and memorable anecdotes.~~

~~Dr. James W. Kalat's BIOLOGICAL PSYCHOLOGY is the most widely used text in the course area, and for good reason: an extremely high level of scholarship, clear and occasionally humorous writing style, and precise examples. Throughout all eleven editions, Kalat's goal has been to make biological psychology accessible to psychology students, not just to biology majors and pre-meds. Another goal has been to convey the excitement of the search for biological explanations of behavior, and Kalat delivers. Updated with new topics, examples, and recent research findings--and supported by new online bio-labs, part of the strongest media package yet--this text speaks to today's students and instructors. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.~~
