Mergers, Acquisitions, and Other Restructuring Activities, Fourth Edition, is a real-world teaching tool for finance courses on mergers, acquisitions, and other restructuring activities. The author, Dr. Donald DePamphilis, shares his academic knowledge and personal experiences with over 30 such deals. The book covers 99 case studies that span every industry, country, and region worldwide demonstrate how deals are done rather than just the theory behind them, including cross-border transactions. The book is ideal for MBA and advanced undergraduate and graduate finance students taking courses in mergers & acquisitions, corporate restructuring, and corporate strategy. Over 90 cases

The applicability and performance of ARIMA, GARCH and multivariate regression models are analyzed and city as well as forecasting horizon-specific patterns are determined and interpreted by Alexander Bönner. Univariate rent forecasting models generally outperform multivariate rent forecasting regression models in the short run. In the long run, multivariate regression models dominate.

Resourceful companies today must successfully manage the entire supply flow, from the sources of the firm, through the value-added processes of the firm, and on to the customers of the firm. The fourteenth Global Edition of Operations and Supply Chain Management provides well-balanced coverage of managing people and applying sophisticated technology to operations and supply chain management.

Dr. Donald DePamphilis explains the real-world of mergers, acquisitions, and restructuring based on his academic knowledge and personal experiences with over 30 such deals himself. The 99 case studies span every industry and countries and regions worldwide show how deals are done rather than just the theory behind them, including cross-border transactions. The interactive CD is unique in enabling the user to download and customize content. It includes an Excel-based LBO model and an M&A Structuring and Valuation Model in which readers can insert their own data and modify the model to structure and value their own deals. CD also real options applications and projecting growth rates. Student Study Guide on CD contains practice problems/solutions, powerpoint slides outlining main points of each chapter, and selected case study solutions. An extensive on-line instructor's manual contains powerpoint slides for lectures following each chapter, detailed syllabi for using the book for both undergraduate and graduate-level courses, and an exhaustive test bank with over 750 questions and answers (including true/false, multiple choice, essay questions, and computational problems). * CDROM contains extensive student study guide and detailed listings of online sources of industry and financial data and models on CDROM * Numerous valuation and other models on CDROM can be downloaded and customized by readers * Online Instructor's Manual with test bank, extra cases, and other resources * Over 90 cases

Revised edition of the author's The map and the territory: risk, human nature, and the future of forecasting, published in 2013.
