Intriguing stories of how people have died in Yellowstone warn about the many dangers that exist there and in wild areas in general.

The chilling tome that launched an entire genre of books about the often gruesome but always tragic ways people have died in our national parks, this updated edition of the classic includes calamities in Yellowstone from the past sixteen years, including the infamous grizzly bear attacks in the summer of 2011 as well as a fatal hot springs accident in 2000. In these accounts, written with sensitivity as cautionary tales about what to do and what not to do in one of our wildest national parks, Whittlesey recounts deaths ranging from tragedy to folly—from being caught in a freak avalanche to the goring of a photographer who just got a little too close to a bison. Armchair travelers and park visitors alike will be fascinated by this important book detailing the dangers awaiting in our first national park.

Intriguing stories of how people have died in Yellowstone warn about the many dangers that exist there and in wild areas in general.

Gripping accounts of all known fatal mishaps in the most famous of the World's Natural Wonders.

Authors Michael P. Ghiglieri and Charles R. Butch Farabee draw on their extensive experience in professional wilderness guiding (34 years) and in wilderness Search & Rescue in the National Park Service (34 other years), respectively, to research and create detailed and compelling stories for every known fatal mishap in Yosemite's complicated recreational wonderland. These sagas span the era from Yosemite's discovery in 1849 today when big wall climbing, BASE jumping, and tumbles off Yosemite's huge waterfalls take such tolls. All 869 mishaps are included; more than 100 are highlighted in dramatic detail and historical context. This book could save your life.

On Mount Washington, it's lack of preparation, not the mountain, that kills. The weather is highly changeable with wind gusts of 140 mph and -35 degree temps. Then there are the avalanches and icefalls. Combine this with inexperienced hikers in t-shirts and flip flops and things can get ugly fast. Death on Mount Washington describes the circumstances behind the tragic tales of those who have lost their lives on the mountain. No one—not even the most experienced mountaineer or pilot—is safe from the mountain's mercurial weather conditions. Learn from the mistakes of others in the comfort and safety of your armchair and remember to respect Mount Washington on your next ski trip.

Morbid, but strangely fascinating accounts In 2015, a group of seven hikers were killed when a sudden flood struck Keyhole Canyon in Zion National Park. Prior to that, the steep, narrow route to Angels Landing led to at least five fatalities. Numerous people have found that high, exposed places in Zion—such as rim trails—are bad places to be in lightning storms. Death in Zion National Park collects some of the most gripping accounts in park history of the unfortunate events caused by natural forces or human folly.

Yellowstone National Park is one of the earth's most famous places. Established in 1872 as the world's first national park, it has preserved remarkable natural wonders like Old Faithful Geyser and cultural icons such as Old Faithful Inn. For centuries, it was home to the Shoshone, Crow, Bannock, Blackfeet, and other Indian tribes, but these groups were banished in the 1870s by park promoters who feared that tourists would not visit if American Indians lived there. Almost immediately after its establishment, Yellowstone became the primary destination for tourist travel to the American West following the Civil War. By 1900, it was a vast tourist success, and today it is both a world biosphere preserve and a world heritage site.

Adventures in the wilderness can be dramatic and deadly. Glacier National Park's death records date back to January 1913, when a man froze to death while snowshoeing between Cut Bank and St. Mary. All told, 260 people have died or are presumed to have died in the park during the first hundred years of its existence. One man fell into a crevasse on East Gunsight Peak while skiing its steep north face, and another died while moonlight biking on the Sun Road. A man left his wife and five children at the Apgar picnic area and disappeared on Lake McDonald. His boat was found halfway up the west shore wedged between rocks with the propeller stuck in gravel. Collected here are some the most gripping accounts in park history of these unfortunate events caused by natural forces or human folly.

Most people visit Big Bend National Park and have a wonderful, incident-free vacation. For a tiny number, however, a simple mistake, unpreparedness, or pure bad luck has led to catastrophe. Massive rescue efforts and fatalities, while rare, do happen at the park. Heat stroke, dehydration, hypothermia, drowning, falls, lightning, and even murder have claimed victims at Big Bend. This book chronicles selected rescues and tragedies that have happened there since the early 1980s. The lessons you learn reading this book may save your life.
