In this timely new book, Christopher Paul analyzes how the words we use to talk about video games and the structures that are produced within games shape a particular way of gaming by focusing on how games create meaning, lead to identification and division, persuade, and circulate ideas. Paul examines the broader social discourse about gaming, including: the way players are socialized into games; the impact of the lingering association of video games as kid's toys; the dynamics within specific games (including Grand Theft Auto and EA Sports Games); and the ways in which players participate in shaping the discourse of games, demonstrated through examples like the reward system of World of Warcraft and the development of theorycraft. Overall, this book illustrates how video games are shaped by words, design and play; all of which are negotiated, ongoing practices among the designers, players, and society that construct the

Video games are part of the growing digital entertainment industry for which game localization has become pivotal in serving international markets. As well as addressing the practical needs of the industry to facilitate translator and localizer training, this book seeks to conceptualize game localization in an attempt to locate it in Translation Studies in the context of the technologization of contemporary translation practices. Designed to provide a comprehensive introduction to the topic of game localization the book draws on the literature in Game Studies as well as Translation Studies.
