Esperanto, the most widely spoken constructed international auxiliary language, is estimated to have between 100,000 and 2,000,000 speakers worldwide. This extensive dictionary was compiled both from existing glossaries and from glossaries prepared by Denisowski.

The earliest cases of farmers' suicides in India were reported in 1998 among cotton cultivators in Andhra Pradesh. Soon after, similar reports emerged from Vidharba in Maharashtra and among red gram cultivators in Karnataka. Since then, the issue of 'farmers' suicides' has acquired disturbing proportions. This book contests the conventional notion of farmers' suicides as seen through the limited scope of agrarian economic distress. Through an ethnographic study in the district of Anantapur in Andhra Pradesh, it delves into the transformations in production, consumption, social relationship, and gender identities in present-day south India. Exploring these interconnected shifts, it interrogates the peripheral factors ascribed to farmer suicides and presents an alternative and more nuanced reality behind this grave crisis. The author contends that rural farmer suicides relate to emerging mentalities and interactions around status, equality, and honour in contemporary India.

"Pharmako dynamis: stimulating plants, potions, and herbcraft focuses on stimulants (including coffee, tea, chocolate, and coca and its derivatives) and empathogens (notably Ecstasy)"--Provided by publisher.

In April 1891, two matters greatly excite the inhabitants of Edinburgh: the decennial Population Census and the Annual General Meeting of the Edinburgh Society for the Propagation of a Universal Language. The General Secretary, Mr Justice, is a militant champion of the highly popular language Volapk; but he is locked in a battle for with Dr Bosman, a shameless apologist for Esperanto. Mr Justice travels the east coast of Scotland in part conducting classes in the grammar and vocabulary of Volapk. En route, he recruits a secret ally an ill-behaved old gentleman who has promised to bring the majority over to the Volapk camp.

Any good text book,particularly that in the fast changing fields such as engineering & technology,is not only expected to cater to the current curricular requirments of various institutions but also should provied a glimpse towards the latest developments in the concerned subject and the relevant disciplines.It should guide the periodic review and updating of the curriculum.

This course is for intermediate and above students who need to speak English in connection with academic work.

Resumen: Are you a post-graduate student in Engineering, Science or Technology who needs to know how to: Prepare abstracts, theses and journal papers Present your work orally Present a progress report to your funding body Would you like some guidance aimed specifically at your subject area? ... This is the book for you; a practical guide to all aspects of post-graduate documentation for Engineering, Science and Technology students, which will prove indispensable to readers. Writing for Science and Engineering will prove invaluable in all areas of research and writing due its clear, concise style. The practical advice contained within the pages alongside numerous examples to aid learning will make the preparation of documentation much easier for all students.

Inspiring people to care about the planet. In the new edition of LIVING IN THE ENVIRONMENT, authors Tyler Miller and Scott Spoolman have partnered with the National Geographic Society to develop a text designed to equip students with the inspiration and knowledge they need to make a difference solving today's environmental issues. Exclusive content highlights important work of National Geographic Explorers, and features over 200 new photos, maps, and illustrations that bring course concepts to life. Using sustainability as the integrating theme, LIVING IN THE ENVIRONMENT 18e, provides clear introductions to the multiple environmental problems that we face and balanced discussions to evaluate potential solutions. In addition to the integration of new and engaging National Geographic content, every chapter has been thoroughly updated and 18 new Core Case Studies offer current examples of present environmental problems and scenarios for potential solutions. The concept-centered approach used in the text transforms complex environmental topics and issues into key concepts that students will understand and remember. Overall, by framing the concepts with goals for more sustainable lifestyles and human communities, students see how promising the future can be and their important role in shaping it. offers additional exclusive National Geographic content, including high-quality videos on important environmental problems and efforts being made to address them. Team up with Mller/Spoolman's, LIVING IN THE ENVIRONMENT and the National Geographic Society to offer your students the most inspiring introduction to environmental science available!
