The seventh edition of this manual has been fully revised to provide trainees in ophthalmology with the latest advances in their field. Divided into 28 chapters, the book begins with discussion on ocular embryology and anatomy, physiology, neurology, pharmacology, refraction, and history-taking and physical examination. Each of the following chapters is dedicated to the diagnosis and management of disorders and diseases in different parts of the eye - lens, uvea, retina, optic nerve, vitreous and more. The book concludes with sections on ocular injuries, blindness, common surgeries, and surgical instruments. The comprehensive text is further enhanced by nearly 1200 ocular images, figures and tables. Key points Comprehensive guide to diagnosis and management of ocular diseases and disorders for trainees Fully revised, seventh edition providing latest advances in the field Highly illustrated with nearly 1200 images, figures and tables Previous edition (9789352501601) published in 2015

With the current rapid development of ophthalmic sciences, it is difficult for ophthalmologists to remain fully up to date with all areas of clinical specialty. The second edition of this atlas describes the latest advances in clinical ophthalmology. Each chapter deals with a separate part of the eye, discussing different diseases and disorders that may be encountered by ophthalmologists. Each condition is accompanied by concise descriptions of major and minor signs, as well as detailed photographs illustrating the disease. This comprehensive new edition features 3750 full colour images and illustrations, including more than 600 additional photographs. Images from the first edition have been replaced with better quality photographs taken with the Haag-Streit BX-900 Photo-Slit Lamp and the Zeiss FF 450 Plus Fundus camera. Key points Comprehensive, new edition bringing ophthalmologists up to date with the latest developments in clinical ophthalmology Each chapter deals with separate part of the eye Features 3750 full colour images and illustrations Includes more than 600 additional photographs Original images replaced with high
