Manual numerical control) systems are essential elements in many industrial processes. The CNC Part Programming Workbook contains 15 learning assignments, each with a number of carefully chosen and structured tasks which will develop the skills needed to work from engineering drawings of components which are to be machined and to produce part programs which incorporate the various commands and functions of a CNC system. There are also three realistic work-based projects which bring together various aspects covered in the workbook. All necessary topics are included from program planning and writing to editing and proving. Supported by many illustrations, the assignments in the workbook will give students and trainees the necessary range of practical experiences to acquire competence in the CAE discipline.

Maximizing reader insights into the key scientific disciplines of Machine Tool Metrology, this text will prove useful for the industrial-practitioner and those interested in the operation of machine tools. Within this current level of industrial-content, this book incorporates significant usage of the existing published literature and valid information obtained from a wide-spectrum of manufacturers of plant, equipment and instrumentation before putting forward novel ideas and methodologies. Providing easy to understand bullet points and lucid descriptions of metrological and calibration subjects, this book aids reader understanding of the topics discussed whilst adding a voluminous-amount of footnotes utilised throughout all of the chapters, which adds some additional detail to the subject. Featuring an extensive amount of photographic-support,

Manual will serve as a key reference text for all those involved in the field.

This book teaches the fundamentals of CNC machining. Topics include safety, CNC tools, cutting speeds and feeds, coordinate systems, G-codes, 2D, 3D and Turning toolpaths and CNC setups and operation. Emphasis is on using best practices as related to modern CNC and CAD/CAM. This book is particularly well-suited to persons using CNC that do not have a traditional machining background.
