Sir Peter Estlin is an independent director of Rothschild & Co as well as Chair of FutureDotNow, a coalition of businesses and organisations working together to boost digital skills across the UK.

Islam's tense relationship with modernity is one of the most crucial issues of our time. Within Islamic legal systems, with their traditional preference for eyewitness testimony, this struggle has played a significant role in attitudes toward expert witnesses. Utilizing a uniquely comparative approach, Ron Shaham here examines the evolution of the role of such witnesses in a number of Arab countries from the premodern period to the present. Shaham begins with a history of expert testimony in medieval Islamic culture, analyzing the different roles played by male experts, especially physicians and architects, and females, particularly midwives. From there, he focuses on the case of Egypt, tracing the country's reform of its traditional legal system along European lines beginning in the late nineteenth century. Returning to a broader perspective, Shaham draws on a variety of legal and historical sources to place the phenomenon of expert testimony in cultural context. A truly comprehensive resource, The Expert Witness in Islamic Courts will be sought out by a broad spectrum of scholars working in history, religion, gender studies, and law.

Tucked among the great pioneer destinations on the Oregon Trail is the fertile agricultural area of the Willamette Valley. Today the valley forms the cultural and political heart of Oregon and is home to three-quarters of the state's population. The beginning of the 20th century saw the entrance of Filipinos into the valley, arriving from vegetable farms in California and Washington, fish canneries in Alaska, and from the pineapple and sugar plantations in Hawaii. At the same time, the U.S. territorial government in the Philippines started sponsoring Filipino students, beginning in 1903, to study in the United States. Oregon's two biggest centers of education, today's University of Oregon in Eugene and Oregon State University in Corvallis, became home to Filipinos from the emerging independent Philippine nation. They were mostly male, the children of wealthy Filipinos who had connections. Most of them returned to the Philippines upon graduation; some stayed and created a new life in America.

Power System Operation and Control is comprehensively designed for undergraduate and postgraduate courses in electrical engineering. This book aims to meet the requirements of electrical engineering students and is useful for practicing engineers.

This edition of Swokowski's text is truly as its name implies: a classic. Groundbreaking in every way when first published, this book is a simple, straightforward, direct calculus text. It's popularity is directly due to its broad use of applications, the easy-to-understand writing style, and the wealth of examples and exercises which reinforce conceptualization of the subject matter. The author wrote this text with three objectives in mind. The first was to make the book more student-oriented by expanding discussions and providing more examples and figures to help clarify concepts. To further aid students, guidelines for solving problems were added in many sections of the text. The second objective was to stress the usefulness of calculus by means of modern applications of derivatives and integrals. The third objective, to make the text as accurate and error-free as possible, was accomplished by a careful examination of the exposition, combined with a thorough checking of each example and exercise.
