Martindale: The Complete Drug Reference provides unbiased and evaluated information on drugs and medicines in use around the world. It is prepared by an experienced team of pharmacists and life scientists who use their professional expertise to select the most clinically relevant and appropriate information from reliable published sources.

This is a source of information on medicines. This updated edition features: encyclopaedic facts about drugs and medicines; information on herbal medicine; synopses of disease treatments; and covers other substances including veterinary drugs, contrast media, diagnostic agents, radiopharmaceuticals, pharmaceutical excipients, poisons, and essential oils.

This is thirty-fifth edition of Martindale, which provides reliable, and evaluated information on drugs and medicines used throughout the world. It contains encyclopaedic facts about drugs and medicines, with: 5,500 drug monographs; 128,000 preparations; 40,700 reference citations; 10,900 manufacturers. There are synopses of disease treatments which enables identification of medicines, the local equivalent and the manufacturer. It also includes herbals, diagnostic agents, radiopharmaceuticals, pharmaceutical excipients, toxins, and poisons as well as drugs and medicines. Based on published information and extensively referenced

This is the standard reference for prescribing and dispensing drugs. In addition to the core information there are notes on the different drug groups to help in the choice of appropriate treatment. The BNF is updated in March and September of each year and compiled with the advice of clinical experts under the authority of a Joint Formulary Committee.

This database allows you to search for unbiased, up to date information about drugs and medicines used across the world. Information includes synonyms/chemical names, molecular formula, adverse effects and interactions.

"Alongside the revalidation work that is undertaken with every edition of Martindale, other changes for this edition include : over 130 new monographs including : drugs for the treatment of type 2 diabetes mellitus, including albiglutide, dulaglutide, empagliflozin, and trelagliptin ; new antibacterials, including ceftolozane, finafloxacin, nemonoxacin, and tedizolid ; investigational monoclonal antibodies for a diverse range of conditions, including multiple sclerosis (ocrelizumab), acquired thrombotic thrombocytopenic purpura (caplacizumab), malignant mesothelioma (tremelimumab), and Alzheimer's disease (aducanumab) ; a quick-reference table of hepatitis C antiviral regimens and numerous new monographs, including dasabuvir, grazoprevir, ledipasvir, ombitasvir, paritaprevir, and velpatasvir."--Préface du volume A.

Excerpt from The Extra Pharmacopoeia The adoption in British Pharmacy of the metric weights and measures is still a desideratum; both are required, as where despatch has to be considered in dispensing liquids, they can be more accurately measured than weighed. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
