Providing a reasonable level of profitability through  
productivity is - and will remain - one of the fundamental tasks  
of the management teams of any production company.  
Manufacturing Cost Policy Deployment (MCPD) and Methods  
Design Concept (MDC): The Path to Competitiveness  
contains two new methodologies to improving the productivity  
and profitability of production systems that continuously  
increase competitiveness: Manufacturing Cost Policy  
Deployment (MCPD) and Methods Design Concept (MDC).

Both MCPD and MDC are the result of long-time synthesis and distillation, being implemented successfully, totally or partially, in many companies. The MCPD system, developed by Alin Posteuca, is a manufacturing cost policy aimed at continuous cost improvement through a systemic and systematic approach. The MCPD is a methodology that improves the production flow driven by the need for Manufacturing Cost Improvement (MCI) for both existing and future products through setting targets and means to continuously improve production process productivity for each product family cost. The MDC, developed by Shigeyasu Sakamoto, design the effective manufacturing methods using a tool of engineering steps identifying ideas for increasing productivity called KAIZENSHIRO (improvable value as a target). The MDC results on production methods lead to effectiveness of work measurement for performance (P) and to knowledge and improvement of production control and planning as utilization (U), in order to achieve labor target costs. The combination of MCPD and MDC methodologies can provide a unique approach for the managers who are seeking new ways for increasing productivity and profitability to increase the competitive level of their manufacturing company.

In Oxford Street, Accra, Ato Quayson analyzes the dynamics of Ghana's capital city through a focus on Oxford Street, part of Accra's most vibrant and globalized commercial district. He traces the city's evolution from its settlement in the mid-seventeenth century to the present day. He combines his impressions of the sights, sounds, interactions, and distribution of space with broader dynamics, including the histories of colonial and postcolonial town planning and the marks of transnationalism evident in Accra's salsa scene, gym culture, and commercial billboards. Quayson finds that

the various planning systems that have shaped the city—and had their stratifying effects intensified by the IMF-mandated structural adjustment programs of the late 1980s—prepared the way for the early-1990s transformation of a largely residential neighborhood into a kinetic shopping district. With an intense commercialism overlying, or coexisting with, stark economic inequalities, Oxford Street is a microcosm of historical and urban processes that have made Accra the variegated and contradictory metropolis that it is today.
