Tools for Teaching in an Educationally Mobile World examines the challenges that undergraduate and postgraduate teachers often encounter when working with students from different national and cultural backgrounds. It focuses on the consequences for interactive teaching and for course design in a world where students, ideas and courses are mobile, using examples and experiences from a wide range of disciplines and national contexts. It not only considers Anglophone countries, including the USA, Canada, the UK, Australia and New Zealand, but also the use of English as a language of instruction in countries where neither teachers nor students are native English speakers. This book offers ideas for adjusting and adapting teaching approaches for culturally and linguistically diverse student groups. Students may cross national boundaries to seek accreditation, or the courses may be 'transnational', being designed in one country and delivered in another using local as well as 'fly-in' faculty. It draws upon growing good practice recommendations using tried and tested methods alongside the extensive and varied experience of the author. The book is structured around a selection of the most common issues and statements of belief held by educators, with key topics including: the impact of educational mobility on teaching and learning; teachers as mediators between academic cultural differences; learning and teaching in English; inclusive teaching and learning; encouraging student participation; assessing diverse students. With a wealth of practical tips and tools that help deal with these issues, this book will be of value to any educator working with students from culturally and linguistically diverse backgrounds. It will also interest those involved in the design of curriculum and pedagogy.

The Kurds, once marginal in the study of the Middle East and secondary in its international relations, have moved to centre stage in recent years. The contributors to The Kurdish Question Revisited offer insights into how this once seemingly intractable, immutable phenomenon is being transformed amid the new political realities of the Middle East.

This volume analyzes crises in International Relations (IR) in an innovative way. Rather than conceptualizing a crisis as something unexpected that has to be managed, the contributors argue that a crisis needs to be analyzed within a wider context of change: when new discourses are formed, communities are (re)built, and new identities emerge. Focusing on Ukraine, the book explore various questions related to crisis and change, including: How are crises culturally and socially constructed? How do issues of agency and structure come into play in Ukraine? Which subjectivities were brought into existence by Ukraine crisis discourses? Chapters explore the participation of women in Euromaidan, identity shifts in the Crimean Tatar community and

diaspora politics, discourses related to corruption, anti-Soviet partisan warfare, and the annexation of Crimea, as well as long distance impacts of the crisis.

When she discovers that her boyfriend is cheating on her, Sydney, a 22-year-old college student, must decide what to do next, especially when she becomes captivated by her mysterious neighbor Ridge. Original.

Experienced by more than one billion people worldwide, disability is increasingly recognised as a human rights issue internationally. Completely up to date, Disability and Human Rights draws on cutting edge international research and real life examples to explore the global dimension of disability and to critically review progress on the implementation of the United Nations Convention on the Rights of Persons with Disabilities. This book provides readers with an in-depth exploration of disability across key areas of human rights, including health, education, employment, accessibility and independent living. It demonstrates how these issues are integral to achieving full and equal participation of disabled people in human societies across the life cycle. The book analyses the impact of poverty, the importance of support and the relevance of culture and it maps out how to make disability rights a reality in the coming decades. Chapters are enriched with a wide range of international case examples and questions for reflection to deepen readers' understanding of the material. Students and practitioners from a wide range of backgrounds, including disability studies, human rights, social work and social care will benefit from this much-needed new global perspective on disability.

The topics studied in this Special Issue include a wide range of areas in finance, economics, tourism, management, marketing, and education. The topics in finance include stock market, volatility and excess returns, REIT, warrant and options, herding behavior and trading strategy, supply finance, and corporate finance. The topics in economics including economic growth, income poverty, and political economics.

The iron element (Fe) is strictly required for the survival of most forms of life, including bacteria, plants and humans. Fine-tuned regulatory mechanisms for Fe absorption, mobilization and recycling operate to maintain Fe homeostasis, the disruption of which leads to Fe overload or Fe depletion. Whereas the deleterious effect of Fe deficiency relies on reduced oxygen transport and diminished activity of Fe-dependent enzymes, the cytotoxicity induced by Fe overload is due to the ability of this metal to act as a pro-oxidant and catalyze the formation of highly reactive hydroxyl radicals via the Fenton chemistry. This results in unfettered oxidative stress generation that, by inducing protein, lipid and DNA oxidation, leads to Fe-mediated programmed cell death and organ dysfunction. Major and

systemic Fe overloads occurring in hemochromatosis and Fe-loading anemias have been extensively studied. However, localized tissue Fe overload was recently associated to a variety of pathologies, such as infection, inflammation, cancer, cardiovascular and neurodegenerative disorders. In keeping with the existence of cross-regulatory interactions between Fe homeostasis and the pathophysiology of these diseases, further investigations on the mechanisms that provide cellular and systemic adaptation to tissue Fe overload are instrumental for future therapeutic approaches. Thus, we encourage our colleagues to submit original research papers, reviews, perspectives, methods and technology reports to contribute their findings to a current state of the art on a comprehensive overview of the importance of iron metabolism in pathophysiologic conditions.

Sparkling and sophisticated, this sometimes hilarious, sometimes heartbreaking debut novel tells the story of a very messy, very high-profile divorce and the endearingly cynical young lawyer dragooned into handling it. Twenty-nine-year-old Sophie Diehl is happy toiling away as a criminal law associate at an old-line New England firm, where she very much appreciates that most of her clients are trapped behind bars. Everyone at Traynor, Hand knows she abhors face-to-face contact, but one week, with all the big partners out of town, Sophie is stuck handling the intake interview for the daughter of the firm's most important client. After eighteen years of marriage, Mayflower descendant Mia Meiklejohn Durkheim has just been served divorce papers in a humiliating scene at the popular local restaurant, Golightly's. Mia is now locked and loaded to fight her eminent and ambitious husband, Dr. Daniel Durkheim, Chief of the Department of Pediatric Oncology at Mather Medical School, for custody of their ten-year-old daughter Jane. Mia also burns to take him down a peg. Sophie warns Mia that she's never handled a divorce case before, but Mia can't be put off. The way she sees it, it's her first divorce, too. For Sophie, the whole affair will spark a hard look at her own relationships—with her parents, colleagues, friends, lovers, and, most important, herself. A rich, layered novel told entirely through personal correspondence, office memos, e-mails, articles, handwritten notes, and legal documents, *The Divorce Papers* offers a direct window into the lives of an entertaining cast of characters never shy about speaking their minds. Original and captivating, Susan Rieger's brilliantly conceived and expertly crafted debut races along with wit, heartache, and exceptional comedic timing, as it explores the complicated family dynamic that results when marriage fails—as well as the ever-present risks and coveted rewards of that thing called love.

This book examines the relationship between risk and resilience in the prevention of mass atrocities. It challenges approaches to prevention which prioritise the role of external actors by investigating how local and national actors mitigate risk over time.

Jonathan Boston and Simon Chapple have written the definitive book on

child poverty in New Zealand. Dr Russell Wills, Children's Commissioner Between 130,000 and 285,000 New Zealand children live in poverty, depending on the measure used. These disturbing figures are widely discussed, yet often poorly understood. If New Zealand does not have 'third world poverty', what are these children actually experiencing? Is the real problem not poverty but simply poor parenting? How does New Zealand compare globally and what measures of poverty and hardship are most relevant here? What are the consequences of this poverty for children, their families and society? Can we afford to reduce child poverty and, if we can, how? Jonathan Boston and Simon Chapple look hard at these questions, drawing on available national and international evidence and speaking to an audience across the political spectrum. Their analysis highlights the strong and urgent case for addressing child poverty in New Zealand. Crucially, the book goes beyond illustrating the scale of this challenge, and why it must be addressed, to identifying real options for reducing child poverty. A range of practical and achievable policies is presented, alongside candid discussion of their strengths and limitations. These proposals for improving the lives of disadvantaged children deserve wide public debate and make this a vitally important book for all New Zealanders.
