I knew she was bad news when she walked into my office, but I just couldn't help myself. Filthy, sexy and full of surprises, Juliet is so hot she has me on fire. I've met my match and I can't help going back for more. Then there's Madison she's sweet, funny and awakens in me a fierce need to protect her. But I don't do relationships. I don't usually do the same woman twice. Juliet and Madison: Two very different women have got me completely hooked. Who will I choose? I know who I should choose, but I never said I was the hero of this story, or even the good guy. And besides, who wants to be good, when it feels so good being bad? My tale isn't for the faint-hearted. If you're game, strap yourself in and expect the unexpected. But don't say I didn't warn you. Achingly sexy and highly addictive, Dirty Dix, the first in the Hard Love Romance series, will have you hooked. Note: Previously published as Addicted to Sin. Why does Skippy, a fourteen-year-old boy at Dublin's venerable Seabrook College, end up dead on the floor of the local doughnut shop? Could it have something to do with his friend Ruprecht Van Doren, an overweight genius who is determined to open a portal into a parallel universe using ten-dimensional string theory? Could it involve Carl, the teenage drug dealer and borderline psychotic who is Skippy's rival in love? Or could "the Automator"—the ruthless, smooth-talking headmaster intent on modernizing the school—have something to hide? Why Skippy dies and what happens next is the subject of this dazzling and uproarious novel, unraveling a mystery that links the boys of Seabrook College to their parents and teachers in ways nobody could have imagined. With a cast of characters that ranges from hip-hop-loving fourteen-year-old Eoin "MC Sexecutioner" Flynn to basketballplaying midget Philip Kilfether, packed with questions and answers on everything from Ritalin, to M-theory, to bungee jumping, to the hidden meaning of the poetry of Robert Frost, *Skippy Dies* is a heartfelt, hilarious portrait of the pain, joy, and occasional beauty of adolescence, and a tragic depiction of a world always happy to sacrifice its weakest members. As the twenty-first century enters its teenage years, this is a breathtaking novel from a young writer who will come to define his generation.

It is a matter of common knowledge among mystics that the evolutionary career of mankind is indissolubly bound up with the divine hierarchies who rule the planets and the signs of the Zodiac, and that the passage of the Sun and the planets through the twelve signs of the Zodiac marks man's progress in time and in space. Therefore, it is not to be wondered at, that in the course of their investigations into the spiritual development of mankind, the writers have also encountered much that deals with the Zodiac, which is the boundary of our evolutionary sphere at the present time. So much has been perceived in the memory of nature that sheds light upon obscure passages of the Bible, that notes have been made from time to time of different points, but how to collect and collate these dissociated writings into a united whole has been a great problem for a long time. Even now, the writers know and feel that what they are bringing forth is only a very, very weak attempt to set before the students that great body of facts which have come to them through the memory of nature. They feel, however, that this will give a 3 4 THE MESSAGE OF THE STARS new and more profound meaning to the old symbols, and that by passing on what has been found they put themselves in line to receive more light. Concerning the future evolution of planets, The Rosicrucian Cosmo-Conception teaches, on page 256, that "when the beings upon the planet have evolved to a sufficient degree, the planet becomes a Sun, the fixed center of the Solar System. When the beings there have evolved to a still greater degree, and consequently it has reached its maximum of brilliancy, it breaks up into a Zodiac and becomes, so to speak, the womb of a new Solar System. Thus the Great hosts of Divine beings who, until then, were confined upon that Sun gain freedom of action upon a great number of stars whence they can affect, in different ways, the system which grows up within their sphere of influence. The planets or man-bearing worlds within the Zodiac are constantly being worked upon by these forces but in various ways according to the stage they have reached in evolution. Our Sun could not have become a sun until it set out from itself all the beings who were not sufficiently evolved to endure the high rate of vibration and the great luminosity of the beings who were qualified for that evolution. All the beings upon the different planets would have been consumed had they remained in the Sun. This visible Sun, however, though it is a place of evolution for beings vastly above man, is not by any means the Father of the other planets, as EVOLUTION AS SHOWN IN THE ZODIAC 5 material science supposes. On the contrary, it is itself an emanation from the central Sun, which is the invisible source of all that IS in our solar system."
