E30 M20 Engine

BMW's 2.5-liter M20 is one its most popular engines and is plentiful; being used in the 325i and 525i of the late '80s. In new condition, the engine makes 168 hp and 164 lb-ft of torque at 5800 rpm and 4300 rpm, respectively. With a rather low compression ratio of less than 9 to 1, the motors are robust and only require regular maintenance.

Rebuilding A BMW M20 Engine For Spec E30 Racing: The ...

The final M20 engines were fitted to the E30 3 Series wagon (estate) and convertible model built in April 1993. The M20 was the basis for the BMW M21 diesel engine. It is also loosely related to the BMW M70 V12 petrol engine.

BMW M20 - Wikipedia

The M20 is an straight-6 piston engine of BMW, whose 12-valve, belt-driven SOHC design in three parts, featuring a main Block with a Sump at the bottom and a Head at the top. If you want help fitting one of these beasts to your car, learn more about the M20 Engine Swap. M20B25 Engine with battery-in-boot

M20 - E30 Zone Wiki

The M20 can be fitted to any E30, no matter whether it started life as an M10, M40 or M42. With the right base vehicle a weekend is enough to get everything bolted in and ready to go. You can even use this guide to replace your existing M20 with a bigger version, and in that case the engines can be swapped over in a matter of hours.

The BMW M20 is a straight-six SOHC piston engine produced from 1977-1993. It was released in 1977 in the E12 520/6 and E21 320/6 and began to be phased out following the introduction of the M50 engine in 1990. Like the larger capacity M30 engine from which it is derived, the M20 has a SOHC and 2 valves per cylinder.

Bmw Engines - BMW M20 Engine (1977-1993)

In 1987, the E30 range was updated. The update contained two significant changes in the engine department. First, the M20 straight-6 engines changed from Bosch Jetronic to Bosch Motronic. This boosted the 320i to 95 kW (129 PS; 127 hp) and the 325i to 126 kW (171 PS; 169 hp) and improved fuel economy.

Engines - Bmw E30

It is claimed (proof?) that M20 engine mounts and a regular E30 transmission mount can be used, although it is unclear what modifications would be needed to make this work. Differential. E36 5-speed transmissions all have 1:1 5th gears. A 3.23 differential with E36 transmissions is found to give good gearing for the street.
